

PRODUCT SHEET

ScreenIT Health & Care

SCREENIT HEALTH & CARE is a floor screen designed for the health care sector and is available in one size. The screen is built with a wood frame, filled with 30 mm soft core material and dressed in vinyl or polyurethane, both which are easy to disinfect and wipe clean. The screen's long sides are both equipped with press studs to enable connecting as many screens as you want. Choose ScreenIT Health & Care on wheels or with a foot set for mobility and storage. Wheels and foot sets are always white. Thanks to the screen's design, there is an air gap between the bottom of the screen and the floor, enabling easy cleaning.

TECHNICAL DATA FOR THE PRODUCT

Long durability | Durable material | Press studs | Air space between screen and floor for easy cleaning |
Can be disinfected | Mobile

MAINTENANCE

Wipe with a damp cloth, use water soap solution. Difficult stains must be removed immediately to prevent permanent absorption into the surface. Material can be disinfected with alcohol based cleanser. After the use of detergents containing chlorine, surfaces must be wiped with a damp cloth and clean water afterwards to avoid degradation of the material. We always recommend wiping the surface afterwards with a damp cloth for an extended life span and preserved appearance. Do not use abrasive cleaners or tools. Vinyl, especially light colours, can even at correct and short time of use, show discolouration.
